se'lux®

Semperlux Aktiengesellschaft

EDV 454 340

COMPANY

Semperlux offers a wide range of **high-quality luminaires**. We provide **innovative ideas** to support **architects** and **planners** in their creative design of both **living** and **workspaces**.

Following this philosophy, the company has developed to become one of the leading manufacturers of interior and exterior luminaires.

While the interior range (our business sector 'INTERIOR') is based on a system of high-quality architectural lighting systems for fluorescent lamps, the design-oriented range of exterior lighting luminaires (our 'EXTERIOR' business sector) is primarily aimed at the public lighting of streets and squares.

The "Corporate Lighting" business sector provides support for the company's formal image, using the medium of light as an integral part of our Corporate Design concept. We offer our clients tailor-made services from planning and design through implementation, to documentation and maintenance.

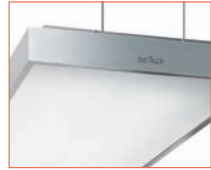

se'lux

Light. Ideas. Systems.

In a world of declining values and mass production, quality and design have become decisive factors. We associate our name and the design of our products to an image combining the highest quality with sophisticated design.

The products we offer are of lasting value and our luminaires are designed to speak directly to those who witness them, evoking a sense of pleasure and communicating positive impressions and quality of life. In everything we do, customer satisfaction is the guiding principle of our philosophy.

Executive board
Berlin, in April 2009

FACTS & FIGURES

In business year 2008, the Semperlux group recorded an overall operating performance of 84.4 million euros with a payroll of 495 employees worldwide. The balance after tax was 2.83 million euros. Foreign business in the group continues to grow in significance. The current fraught economic situation is not exactly an impetus for growth. That having been said, although investment in building construction in general is restrained, there is a growing demand in the local municipality sector. And we are meeting this demand with our innovative and energy-efficient range of products. Our luminaires have continued to prove their worth over time, which is documented in a double-digit increase in our domestic turnover of sales of 24.7 per cent, with 13.6 per cent in the Semperlux group worldwide. The international portion of sales amounts to 75 per cent.

selux-Group Annual Statement 2008

Balance

Figures in TEUR	Assets		Liabilities	
Capital assets	14,455	Equity	18,339
